GEA and Conestogo would like to personally invite you to a dairy producer meeting.

This producer meeting is targeted towards the owners and their employees who perform the milking schedule on your dairy. The GEA Milking & Cooling Sales Specialist will share the latest updates on the following topics.

- Basics of milking machine function.
- The relationship between you and the cow – how prep procedures affects milk let-down.
- How to achieve maximum milk flow and maximum milk harvest.
- Pulsation function.
- The effects of pulsation rates and ratio.
- Understanding a pulsation cycle. A/B/C/D phases.
- Optimizer Program for optimizing the milk harvest.
- Detacher settings.
- The affects vacuum levels have on milk harvest.
- Tools to evaluate system and milking vacuum.
- Objective of liners.
- The importance of milk cluster alignment.
